### NEW Reference H01 Series

 A-H01-B  
 A-H01-S

**NEW**

**Stereo Amplifier with integrated D/A Converter Circuitry.** The heart of the Reference H-01 Series is the new "Power DAC" A-H01 – a digital amplifier concept capable of providing up to 2 x 50 watts of clean power for signals processed through a high resolution, 32 bit, 192 kHz D/A converter chipset (type 1795) from the experts at Burr Brown®. A PC or MAC computer can be connected to this component via the Tenor® USB Audio Class 2 input on the rear panel.

376,00

**451,00** EUR

 PD-H01-B  
 PD-H01-S

**NEW**

**CD Player with USB interface.** PD-H01 - CD-Player with USB Interface. CD Player and Computer Drive Combined. Music lovers wanting the versatility of playing their CDs or transferring the music from a CD to their computer hard disk will find the TEAC PD-H01 has been designed to accomplish both jobs. The versatile slot-in drive mechanism accurately reads the digital information from an audio CD for either regular playback or rerecords the data through the built-in USB digital interface and converts the data into other digital formats – a process normally called "CD Ripping".

218,00

**262,00** EUR

 UD-H01-B  
 UD-H01-S

**NEW**

**DA Converter with USB Audio Input.** The External Sound Card for all PC's The UD-H01 is a dual digital/analog converter containing two BurrBrown® DAC chipsets (Type 1795) and a Tenor® USB Audio interface. These components make the UD-H01 equal a stand alone, high performance external sound card with HiFi quality using up to 32 bit, 192 kHz conversion technology.

286,00

**343,00** EUR

 DS-H01-B  
 DS-H01-S

**NEW**

**Digital iPod Dock. Station + D/A Converter** Those technical enthusiasts who have decided to use an iPhone®, iPod® or iPad® to store their digital music or video files do not have to sacrifice high fidelity listening pleasure. TEAC has developed the DS-H01 – a digital docking station for trendy Apple products designed to process digital audio and video signals. Audio signals from compatible Apple products are processed through high quality, BurrBrown® 24bit, 192 kHz D/A converter chipsets.

### NEW Dynasty Distinction Series

 AI-1000-B  
 AI-1000-S

**NEW**

**Amplifier** - 120 watts of power per channel (at 4Ω) are hidden behind the elegant aluminum front panel. This model comes equipped with a headphone output, an RCA pre-out, six RCA analog audio inputs (SACD, CD, Tuner, Tape, Aux and line direct for especially high quality sources) and heavy duty, screw type loudspeaker terminals. The remote control unit – as with all Distinction Series Amplifiers – is included as a standard accessory.

598,00

**718,00** EUR

 AI-2000-B  
 AI-2000-S

**NEW**

**Mid-series amplifier** supplies up to 180 watts of power per channel (at 4Ω). The AI-2000 offers step-up quality hardware and connectors such as XLR balanced audio inputs and RCA phono inputs leading to a quality phono pre-amp stage. Up to two pairs of loudspeakers can be connected to the heavy duty, screw type speaker terminals.

855,00

**1.026,00** EUR

 AI-3000-B  
 AI-3000-S

**NEW**

**Amplifier** - a highly stable, semi-toroidal power transformer in the AI-3000 provides the basis of exporting an impressive 360 watts of clean power per channel (at 4Ω) - easily capable of driving up to two pairs of demanding loudspeakers simultaneously. In addition to SPDIF audio inputs, two XLR balanced analog audio inputs complete the array of quality source connections on the rear panel.

1.863,00

**2.236,00** EUR

 CD-1000-B  
 CD-1000-S

**NEW**

**CD/SACD-Player** provides CD, SACD and CD-R/RW disc playback. Quality digital/analog conversion is guaranteed by a first rate 192 kHz multi-bit D/A converter from Cirrus Logic® (CS 4398). As with all Distinction Series CD/SACD Players, the CD-1000 has a full aluminum front panel and an easy to read FL-display. Two outputs (1 x RCA analog, 1 x coaxial digital) are provided. The player has its own remote control unit or can be operated with a Distinction Series Amplifier remote.

549,00

**659,00** EUR

 CD-2000-B  
 CD-2000-S

**NEW**

**CD/SACD-Player** incorporates the same high quality D/A converter chipset used in his "little brother", the CD-1000. In addition, the CD-2000 has a USB Audio Class2 input allowing digital audio data from a PC to be routed directly to the internal D/A converter. True, detailed reproduction from the music library stored on a PC is guaranteed. Equipped with balanced analog audio outputs, the CD-2000 makes a perfect source matching the AI-2000 amplifier.

731,00

**877,00** EUR

 CD-3000-B  
 CD-3000-S

**NEW**

**CD/SACD-Player** Each Channel has its own D/A Converter. The CD-3000 tops the features and performance of the CD-2000 model by adding an additional coaxial digital input and by supplying each audio channel with its own separate high value Cirrus Logic® D/A converter! Connecting the CD-3000 player to the AI-3000 integrated stereo amplifier results in creating a TEAC Distinction Series high performance audio dream team.

1.341,00

**1.609,00** EUR

 TU-1000-B  
 TU-1000-S

**NEW**

**Classical Digital Stereo Tuner.** Slim tuner for AM/FM RDS reception with presets, RCA output connectors and Antenna inputs. The TU-1000 has a full metal precision control machined from a block of solid aluminum matching the hardware those other components in the Distinction Series for that added touch of quality. A blue, back lit FL display indicates selected station information. A separate remote control is supplied with the unit.
